FEEDBACK POLICY

United Institute of Technology understands that coaching-mastering system observed by an Educational Institution needs continuous refinement. To qualify this process of constant refinement and improvements, the institution has followed a feedback system that takes ideas from stakeholders of every programme. This ultimately enables to hone the teaching-learning to know the curriculum developments, delivery, Employment requirements, and as well as the academic conduction process. The Institute follows the mechanism targeted underneath for series of the comments from Students, Faculty, Alumni and Employers on curriculum.

Feedback Collection Process:

Feedback forms with whole curriculum-orientated questionnaires are designed separately for students, faculty, alumni and employers. These forms are shared physically with stakeholders and also through online if required for series of remarks and precise timeline has been allotted for the process. Response for every question is recorded. The Management and higher authorities planned to implement the collection of feedback forms through online mode too from subsequent academic years onwards which is decided through the meeting of Governing council. The format of the curriculum feedback herewith given below.
